

**WG2 (ISIN Quality and Guidelines)  
Convenor's Report 2010**

Due to a change in Board appointments, the role of Convenor of WG2 was handed over from Emma Kalliomäki to Óscar García of CNMV, the Spanish NNA. Óscar has been an active participant in WG2 matters and has further established his commitment by taking this role.

Over the year, continued focussed was placed on reviewing and updating the latest version of the ISIN guidelines, incorporating additional comments to ensure the guidelines remain aligned with the current version of ISO 6166.

In the coming year, a new version of ISO 6166 is expected to be published and there will be a requirement for the Working Group to identify changes between the previous and new versions of the Standard, and apply these to the guidelines.

Following the above exercise, an opportunity will exist for the Working Group to focus on identifying NNA ISIN allocation practices, and to assist NNAs with implementing and understanding any changes resulting from the new version of the Standard being published.

As always, the Working Group participants are available to assist or provide guidance to members on ISIN allocation and applying the Standard at any time.
